

HSE Policy

ACIST Europe is committed to maintain health and safety at work and protect the public health and environment. The reduction of incidents, waste, the use of natural resources and the decline in our emissions have top priority within all our activities. The ACIST Management Team Europe will ensure that the HSE policy is implemented and maintained. They will ensure integration of the environmental system into the organizational processes and take accountability for the effectiveness of the environmental management system including defining goals and assuring that they are achieved. The ACIST management team is committed to continual improvement, enhancing the environmental performance and meeting compliance obligations. Each people leader has to ensure that health, safety and environment get adequate consideration in the planning and day-to-day supervision of all work. Each employee has to work safely and actively towards the achievement of the goals, to adhere to the nature of the policy, and to report behavior and situations that represent an unacceptable risk to health or the environment.

HSE High Level Focus Points

- Maintain health and safety at work and protect the environment
- Make less use of materials or methods that negatively impact the environment
- Enhance the environmental performance
- Save energy and natural resources and prevent pollution
- Reduce waste and increase the recycling of waste
- Integrate HSE concepts into planning and decision-making
- Encourage active employee participation in HSE efforts
- Commit to continual improvement
