ACIST Receives Prestigious Frost & Sullivan Technology Innovation Award

Minneapolis, MN, February 10, 2008 – ACIST Medical Systems, the innovator and market leader in variable-rate contrast injection systems for cardiac and vascular angiography, is pleased to be the recipient of the Frost & Sullivan Technology Innovation Award.

According to Frost and Sullivan, “ACIST Medical Systems’ ability to provide innovative, variable-rate contrast injection solutions for cardiovascular angiography applications has endeared the company to its customers. ACIST offers flexible system configurations to meet the specific needs of the customer, lab workflow and patient. For these reasons, Frost and Sullivan recognize ACIST Medical Systems for its ongoing commitment to excellence in medical technology.”

“This award from Frost & Sullivan is quite an honor. It further validates ACIST’s focus on innovation - especially innovation developed with the purpose of making things better and easier for physicians and their patients around the world,” states Fulvio Renoldi Bracco, CEO of ACIST. “We believe this award demonstrates our commitment to continuous innovation. The ACIST CVi system is a fourth-generation product developed as part of a continuing effort to address customer needs. We look forward to ACIST having even more significant innovations in variable-rate contrast delivery coming to market in the near future.”

About ACIST

ACIST is a world leader in contrast delivery solutions for the imaging field, dedicated to advancing the art of angiography through research and development of new products and technologies – supporting today's needs and anticipating those of tomorrow. More than four million people around the world have had cardiovascular angiographic procedures using an ACIST system, now at over 1 million annually – and growing. ACIST systems are widely proven in the global health care arena, with clinical usage in over 30 countries and in many world-renowned centers, as well as in community hospitals and university settings.
